UNDERWATER COMMUNICATION AND POSITIONING SOLUTIONS

Evo Logics®

S2C TECHNOLOGY: COMMUNICATION AND TRACKING COMBINED

- time, space and cost-saving solutions
- low power consumption for autonomous operations
- advanced data delivery algorithms, addressing and networking, remotely configurable settings
- extendable platform with multiple configuration options: power-saving Wake Up module, acoustic releaser, additional sensors, custom solutions, OEM versions available

USBL POSITIONING SYSTEMS

simultaneous positioning and communication - no need to switch between positioning mode and modem mode

- flexible SiNAPS positioning software
- reliable data transmissions
- range: up to 8000 m
- accuracy: up to 0.04 degrees

UNDERWATER ACOUSTIC MODEMS

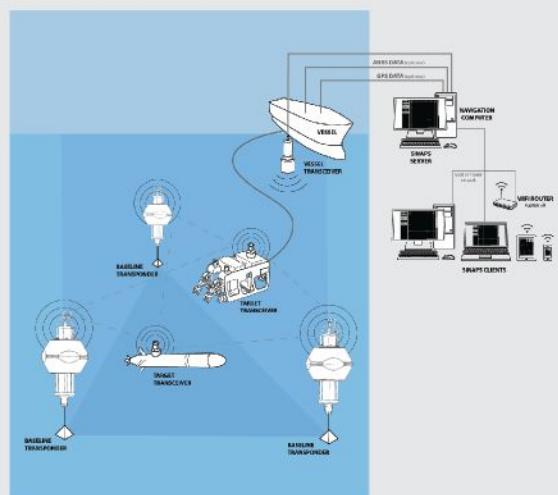

reliable data transmissions even in adverse conditions, customizable R-series modems, light and compact M-series "mini" modems, **new S2CM-HS high-speed modem**, special editions for developers, S2C communication and positioning emulator - remote access or standalone device

- range: up to 8000 m
- depth: up to 6000 m
- data rate: up to 62.5 kbps

LBL POSITIONING SYSTEMS

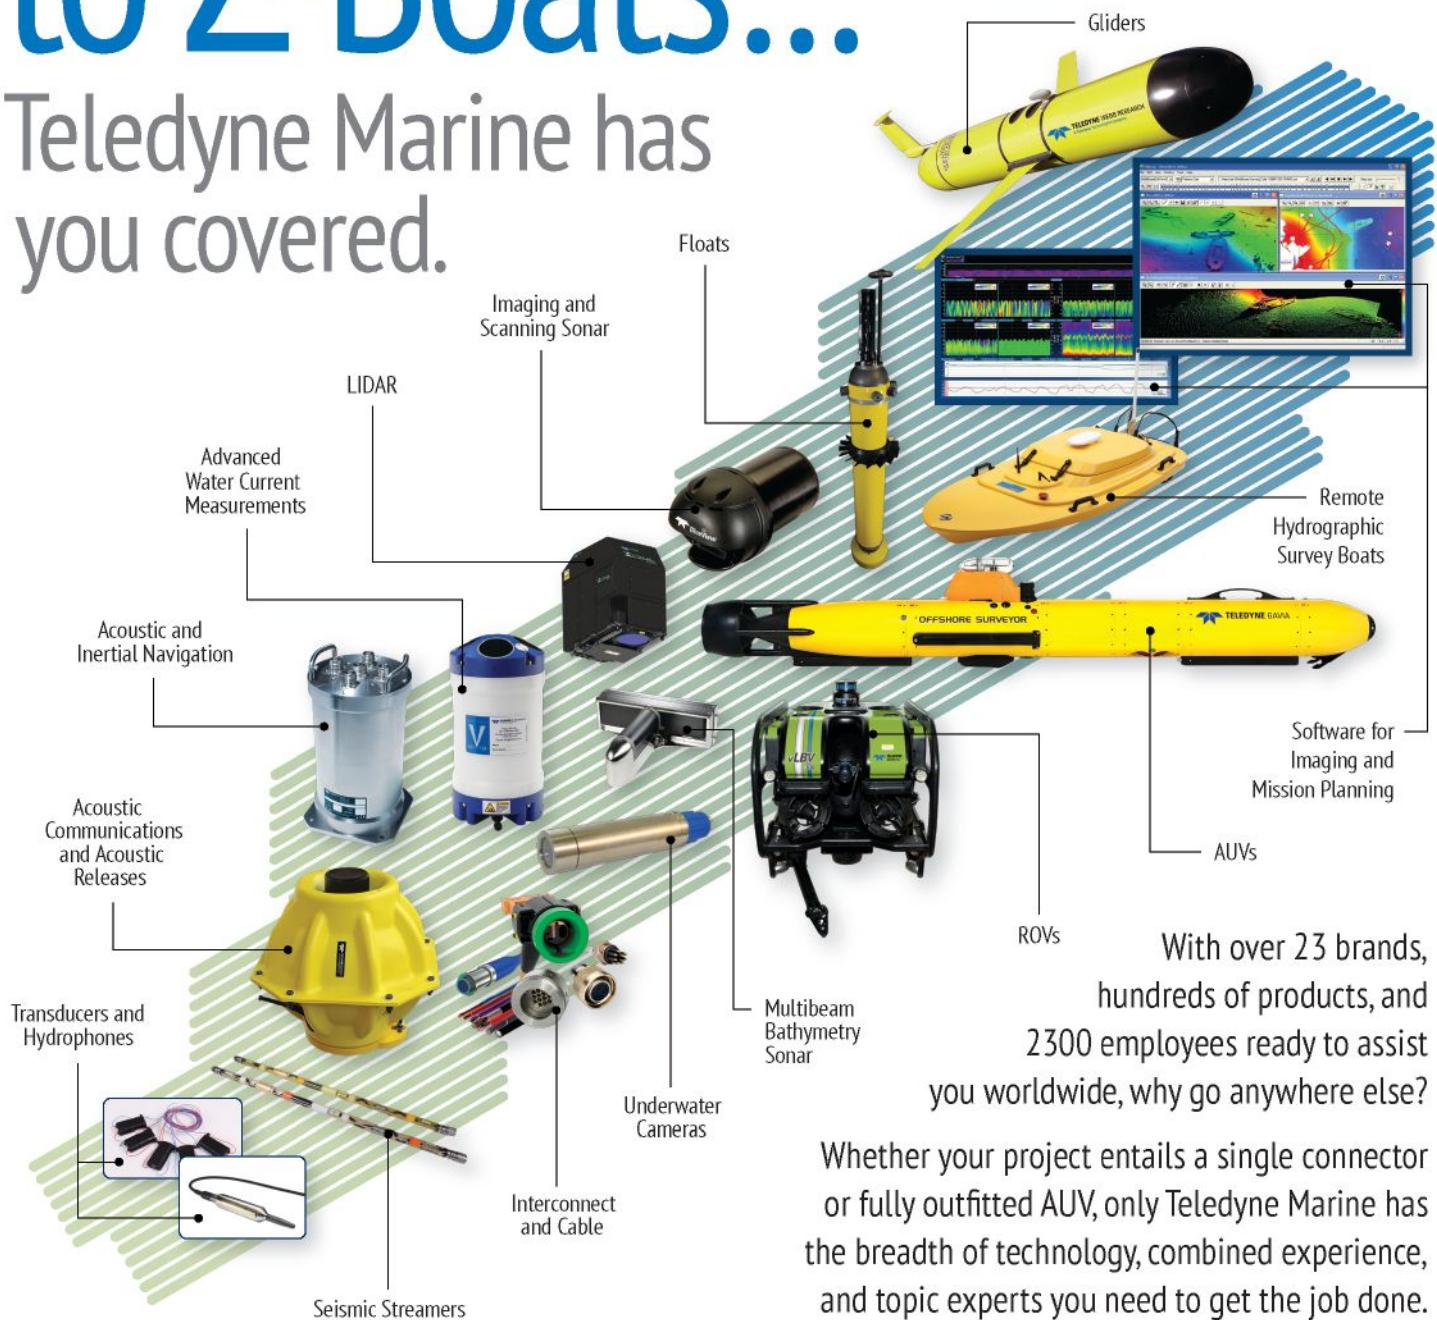

highly accurate, precise and stable performance, simultaneous positioning and data transmissions

- flexible SiNAPS positioning software
- reliable data transmissions
- range: up to 8000 m
- accuracy: better than 0.01 m

From Acoustics to Z-Boats...

Teledyne Marine has
you covered.

With over 23 brands,
hundreds of products, and
2300 employees ready to assist
you worldwide, why go anywhere else?

Whether your project entails a single connector
or fully outfitted AUV, only Teledyne Marine has
the breadth of technology, combined experience,
and topic experts you need to get the job done.

IMAGING • INSTRUMENTS • INTERCONNECT • SEISMIC • VEHICLES

Eaton's Burton™ connectors have set the standard for deep-water performance for over 40 years

Dry-mate shell sizes 9 - 48

Wet mate from 3 to 16 contacts

Pressure Balanced Oil Filled (PBOF)

Overmolded cables

Micro-wet-mate connectors

Custom solutions

OPERATIONAL EXPERTISE. GLOBAL REACH. PROFESSIONAL RESULTS.

Our marine services team provides extensive operational experience

GEOPHYSICAL

- Side-scan sonar
- Subbottom profiling
- Bathymetry/single-beam
- Magnetometer capabilities

REMOTE SURVEY PLATFORMS

- Unmanned surface vehicles
- ROV systems, including HD cameras
- Wide array aerial survey platforms
- Easy transportation

PHOTODOCUMENTATION

- Diver-held HD video and still camera capabilities
- Self-contained advanced diver navigation systems
- Towed HD video and still cameras
- Ground-truthing services

GEOTECHNICAL

- Vibracoring
- Sediment sampling
- Cone penetration testing

METOCEAN

- Oceanographic surveys
- Water quality data collection
- Meteorological measurements
- Acoustic Doppler current profiler data collection

Submarine Cable World™

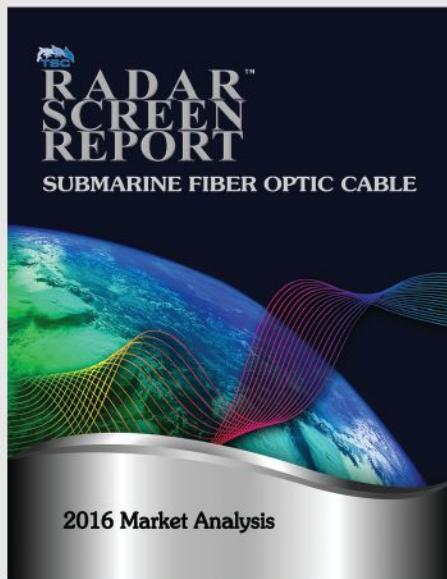

Daily Newsfeed • Industry Analysis • Consulting Services

The highly specialized
2016 Radar Screen Report is
available this year in three volumes

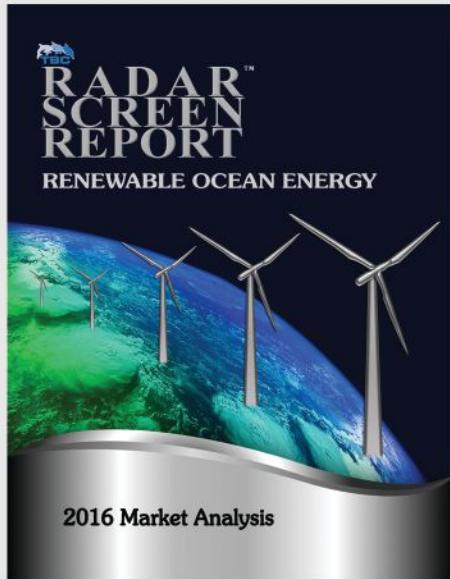

SUBMARINE POWER CABLE

SUBMARINE FIBER OPTIC CABLE

RENEWABLE OCEAN ENERGY

- Review of 2015 Contracts
- Forecast Demand 2016-2021
- Major Factors Impacting the Market
- List of 2015 Projects Under Contract
- List of Future Planned Projects

Order Today!

The 2016 Radar Screen Report™ is available in January and includes a mid-year update.
Place your order at www.subcableworld.com

Subscribe to the Submarine Cable World Daily NewsFeed™

*Delivered electronically every weekday, the Submarine Cable NewsFeed™
includes the latest developments in:*

- Submarine Fiber Optic Communications
- Power Cables
- Renewable Ocean Energy
- Marine Cable Installation & Maintenance Services
- Regulation of Cables
- International Telecom Carrier Activities
- International Internet Markets

H&L Instruments
no. hampton, new hampshire, usa
Fiberoptic Digital I/O
Model 531-B

H&L Instruments
Model 531 Fiberoptic
Remote Digital I/O
"Wire Replacer"

- Galvanically isolates eight 12Vdc to 250Vdc inputs from eight microprocessor controlled, fault protected outputs via fiberoptic cable.
- Uses fiberoptic technology that supports communication distances up to 120 km.
- 8 DI/DO interface: Eight inputs on one unit control eight relays on a second unit via fiberoptic cable.
- Available with either solidstate or electromechanical relays.
- Eliminates ground loops and maintains floating signals at both local and remote locations.
- Latches and retains relay output states using CRC checking of fiberoptic data packets.
- Bidirectional communication over fiberoptic cable enables complex control and monitoring between local and remote devices.
- Supports single-mode or multi-mode fiber.

In use for safe and reliable electrical control of ROV/MROV systems, drillship operations, remote well-head jacket control, deep oil platforms, satellite platforms and more.

Don't just monitor it, manage it!

Struggling with multiple data formats and complex monitoring requirements?

Worried that you are making decisions on out-of-date or incomplete data?

OceanWise's Environmental Data Sharing and Publishing helps you get the most out of your investment in data monitoring

- Easy and inexpensive viewing and sharing of real-time data
- Secure and straightforward archiving and storage of all types of marine data
- Data accuracy, integrity and reliability
- Optimised and robust solutions for complex monitoring needs

OceanWise where your data matters

Enjoy the confidence of working with marine data experts
For information contact info@oceanwise.eu

FlexSEA

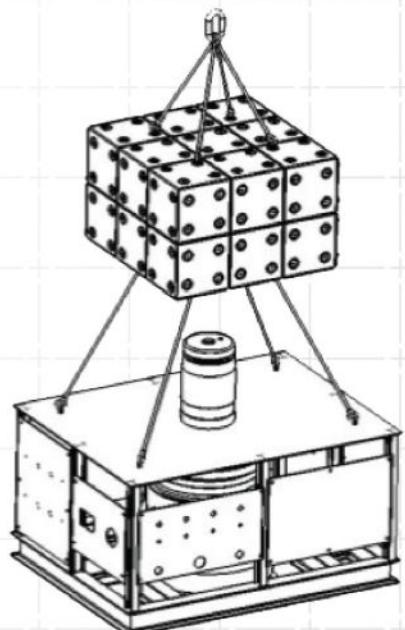

Modular Flotation Like Never Before

Detachable connection and positioning allow for a variety of geometries.

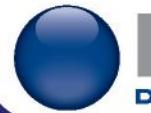

The connection hardware facilitate attachments to maintain structural integrity of the array.

Introducing the FlexSEA™ Modular Flotation System available for rent exclusively from Okeanus Science & Technology. We offer FlexSEA™ flotation modules in a variety of sizes to supply different amounts of buoyancy for a variety of payload sizes and weights. Our unique modules may also be configured to form arrays suitable for a wide variety of subsea modules, tools, instrumentation packages, vehicles and submersibles including ROV mounted intervention packages.

iXBLUE
DEEP INSIGHT. SHARPER SENSES.

SUPERIOR NAVIGATION, POSITIONING AND IMAGING SOLUTIONS

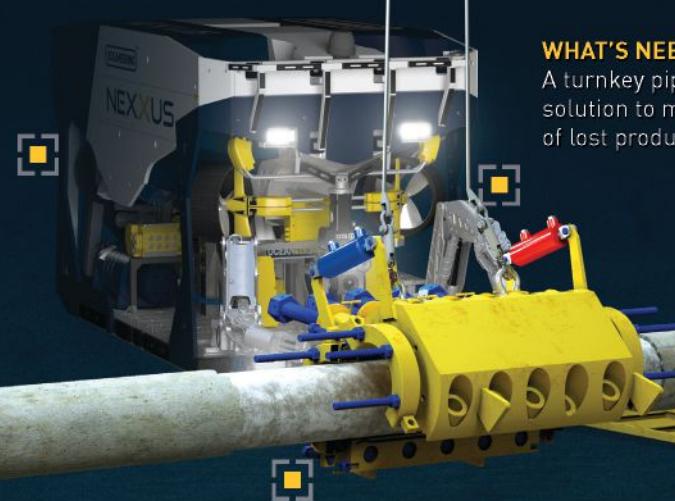

Discover more about iXBlue at www.iXBlue.com

Connecting What's Needed with What's Next™

WHAT'S NEEDED:

Identify and proactively address pipeline anomalies and defects.

WHAT'S NEEDED:

A turnkey pipeline integrity solution to minimize risk of lost production.

WHAT'S NEXT:

A trusted global partner to help ensure uninterrupted production and deliver rapid and comprehensive Emergency Pipeline Repair Solutions (EPRS).

Copyright © 2016 Oceaneering International, Inc. All rights reserved.

As the trusted subsea connection specialist, we focus intently on the many challenges that global offshore operators face—from routine to extreme. Our integrated pipeline integrity solution is a rapid and comprehensive response to emergency pipeline repairs anywhere in the world. In addition to bringing production back on line quickly, our proactive approach to protecting our clients' assets can help prevent the need for an emergency response in the first place. The result of this integrated solution is reduced exposure to unplanned events that can adversely affect the environment and disrupt production.
